CHANDELIER HOIST SYSTEMS 100-300kg Lifting Capacity

**CH100 (100kg), CH200 (200kg)
CH300 (300kg)**

240v x 1ph AC

FOR LIFTING AND LOWERING CHANDELIERS AND OTHER SUSPENDED FIXTURES

Situated in the ceiling void or a suitable area, these hoists have been designed specifically to enable lifting and lowering of chandeliers and other suspended fixtures for safe and easy maintenance.

Built to the highest standards to ensure reliability and minimum maintenance, the hoists will safely and securely hold the fixture in place.

Supplied with spin resistant wire rope.

A double pulley system can enable repairs or maintenance without disconnecting power supply.

Can be calibrated to stop at full ceiling height and preferred lowered position.

HOIST FEATURES INCLUDE:

- **A choice of three hoists - 100kg, 200kg or 300kg lifting capacity**
*With different capacities for heights of lift
Larger hoists for heavier duty can also be supplied*
- **Operates on standard 240v household supply**
- **Efficient load holding**
Dual braking - independent ratchet brake running in oil and electromagnetic motor brake
- **Lightweight and compact design**
Aluminium die-castings to save weight and the compact design enables installation in small roof voids
- **Available in different drum lengths**
To provide choice for wire rope length
- **Enclosed drum flange**
Prevents the wire rope becoming trapped between the drum and support casing
- **Smooth running gearbox**
Quiet and efficient spur gearbox

Choice of motor position

CH200 and CH300 motors can be mounted in any of the three positions shown to suit the space available.

For easy electrical installation - complete with contactors and numbered termination blocks
- **'Key only' access control switch**
For additional security and safety
- **Double pulley, for the hoist and power cable**
Power can remain connected to the fixture and cable will simply pay out from the automatic cable rewriter
- **Single pulley - for hoist only applications**
When power is not connected, or fixture only requires wire rope
- **Rotational limit switch with upper and lower stop settings**
Calibrated by the installer to suit individual installation
- **Automatic power cable rewriter**
Certified as suitable for the application (The kw rating and circuit details of the light fitting should be specified to Winchmaster at the time of order)
- **Non rotating wire rope supplied to correct length**
This is calibrated by Winchmaster to allow for winch requirements and the distance from floor to ceiling
- **Protection covers**
To protect the hoist, pulleys or cable rewriters from falling debris or dust
